## *Hello Cattlemen!*

Welcome to the 20th Annual Edge of the West Production Sale! We sincerely appreciate your interest in the sale. We look forward to visiting with you and anticipate your appraisal of what we feel is truly a top end set of breeding stock.

It was another unpredictable weather year in North Dakota! I think we could write about that every year. One thing about it, the folks in the cattle business keep persevering through thick and thin. The cattle market went on a wild ride this year but overall, the price of feeder cattle is still very good and with cow numbers staying low we should be in for a sustainable market for the foreseeable future. Now is the time to make sure we are stocked up with top quality genetics to capitalize on it.

As a group we have always emphasized the cow first. We demand a female that is moderate in her frame, big bodied and sound structured. She also needs to possess a high-quality udder, calve by herself and mother her calf. We don't have time to help them calve and nurse and we assume most ranches don't either. If you retain your own replacement females rest assured the bulls in this offering will sire the 'keepin' kind of cows we all desire.

This year each sale partner fed their own cattle at their respective ranches. The Kaelberer bulls and bred heifers were fed a TMR consisting of corn silage, haylage, chopped hay, wet corn, distillers and a CHS mineral pack. Kinn bulls were fed at Tyler's place near Turtle Lake. The SRF bulls and bred heifers were fed at their place. Each of these sets of cattle were fed a mids based high fiber complete pellet with added corn, fortified with a Platinum trace mineral package and free choice hay. We each try to develop our cattle with their longevity in mind. These rations attempt to show genetic differences while maintaining hoof integrity and longevity.

The bred females in the sale are definitely the keepin' kind. Females purchased through the Edge of the West sale partners have gone on to raise sale topping progeny for their new owners. Each partner fed their females at their respective ranches so please visit with each of us if you have any questions regarding the females.

An exciting feature to this year's bred heifer division is the complete dispersal of the Claye and Michelle Kaelberer bred heifers. This is a unique opportunity to tap into the freshest genetics of the Kaelberers' life work. Not often does one get a chance to take a pick of the entire bred heifer crop representing nearly 50 years in the Simmental business!

Again this year we have designated several bulls for homozygous polled and homozygous black testing, as well as genomically enhanced EPDs. These bulls have either been DNA tested or determined to be this way through pedigree analysis. The bulls and females that have genomically enhanced EPDs will be marked with the 'ASA DNA' logo.

Also new this year, some of the offering has been tested through the Right Choice program from Allied Genetic Resources and Top Genomics, LLC. This is a relatively new program that evaluates genomic information along with EPDs to help us make better decisions for our customers and their operations. More info on this program can be found later in the sale catalog.

If you have any questions regarding the bulls or females, please do not hesitate to contact any of the owners or the sales staff. We feel the cattle represented in this sale are the right kind to advance any program in the right direction.

We appreciate your interest in the sale and look forward to seeing you on February 13th!

Sincerely,  
The Kaelberer Family • The Finke Family • The Kinn Family

# February 13, 2024

1 p.m. CST

Kist Livestock, Mandan, ND

**Sale Day Phone:**

800-732-1163 or 701-663-9573

**Please see our website to view photos and videos**

**www.edgeofthewestsale.com**

- Announcements made from the auction block during the sale take precedence over printed material in the catalog or other printed material associated with this sale.
- Several lots will have Color & Polled results listed. These bulls have either been DNA tested or determined through pedigree to be either homozygous or heterozygous for these traits.
- Cattle with Genomically Enhanced EPDs will be marked with the ASA DNA logo.
- Birthweights listed in the catalog are Adjusted by the ASA for age of dam.
- Cattle will be available to view after 12:00 pm on Monday, February 12, 2024 at Kist Livestock or prior at Kaelberer Ranch, New Salem, ND and Kinn Simmentals, Turtle Lake, ND and SRF Simmentals, Berthold, ND
- Free Delivery in North Dakota and the closest Port of Entry, delivery beyond at cost.
- Free Feed until April 1st. We would like to take the bulls back to our ranches to continue to develop them. We will semen test the first part of April and begin delivering the beginning of April. Please visit with one of the Sale Partners if you need feeding arrangements beyond the beginning of April.
- Insurance will be available sale day.
- Terms & Conditions of this sale will follow the guidelines set forth by the American Simmental Association.
- Sale day meal will be provided compliments of the Edge of the West group
- Sale Headquarters will be the Holiday Inn in Bismarck. Their phone number is 701-751-8240.
- Volume Discount: 3% on 3 bulls, 4% on 4 bulls & 5% on 5 or more bulls
- Please see our website to view photos & videos on all the bulls: [www.edgeofthewestsale.com](http://www.edgeofthewestsale.com)

# Improved Buying Confidence with Greater Genomic **ASSURANCE**

Access to more and better information has always been key to making wise decisions. The evolution and improvement of genetic evaluation tools too has given us an ever-clearer picture of the true genetic makeup of cattle and thus a better view of the value proposition. RightMate, powered by Top Genomics LLC is taking the evaluation of genetics and genomics one giant step further. By combining specific genomic information with the long-proven value of EPDs, this new advancement in technology improves our depth and precision when evaluating the actual ability to transmit value and profit.

The 3 Accreditation Logos below are designed to simplify bull selection and improve buyer confidence by more accurately describing the genetics offered and by reducing risk. What this means to you as a customer is a much greater assurance that you are getting both what you want and need from the genetics you purchase. What it means to your seedstock provider is access to RightMate technology that simply sets them apart from the rest of the industry.

**ACCREDITED CALVING EASE** – Simply find bulls with the ACE logo for third party Accredited, secure Calving Ease bulls. Though we have had tools in the past to assist in choosing heifer bulls, we've never had one nearly this effective. The reduced risk that comes with this genomic certification will simply make your decisions easier and your heifer calving season more successful. Purchase special purpose ACE bulls with confidence. They will deliver consistent and predictable calving ease.

**ACCREDITED TERMINAL MATE** – Just like an ATM machine makes it simpler to access your cash, the ATM Logo highlights bulls accredited to generate extra cash income as soon as your next calf crop! These bulls are meant specifically to use only on mature cows and for the purpose of adding performance, pay weight and end product value to market.

**ACCREDITED GENOMIC PLUS** – For the majority of producers who simply need consistent and balanced genetic improvement, without genomic setbacks, G+ Accredited bulls should be on your list for premium purchase. These sires will absolutely move you forward for both cost reduction and income producing traits and substantially reduce risk when compared to all other evaluation programs. It's simple, the right genes are in these bulls to help secure a profitable future and the they have great EPDs to match!

LOT 1 • KINNS 541L

Homozygous Polled • Homozygous Black • The LRS Baltic cow flushed to the Black Ice bull really clicked. 541L was the only bull calf along with 3 heifer calves in this flush, that all look great. If you want a bull to go out and produce calves that are long bodied, and that will weigh up in the fall, this is the bull for you. He is number 1 in the breed for WW and YW.

Homozygous Polled • Heterozygous Black • L29 is a studly half blood bull with an outcross pedigree. We purchased this bull's mother from the Sunrise dispersal in Canada, and boy did she do her job well the first year. He sells as non-registrable, due to a registration hold-up with the Canadian Angus Association.
